

In 1999 we started our factory with great enthusiasm and strong entrepreneurship along with some skilled personalities. In the decade of nineties the sponsors felt the need of setup a knitted apparels project to meet up the global market need. At the moment this company has set up to meet up all of export market requirements.

Texgen group's total commitment to its products and customers has helped it grow from a knit fabric manufacturer to a composite and garment manufacturer. Texgen group is a pioneer in introducing European technology in knit fabric manufacturing in this country. It started its journey with a 3.00 Ton per day capacity knit fabric plant in early 1999 and now its capacity has increased to 16.50 tons knit fabric per day, 8500 sets collar & cuff per day. With the addition of two garment manufacturing units having over 442 machines, with capacity about 15000 pcs basic T-Shirt, 8000 pcs Polo Shirts per day. We are in a position to serve the ultimate users to their satisfaction. We may not be so big if the capacities are considered but our commitment to quality and adaptability to the ever-changing customer demand is our strength.
