

To provide our customers with a best quality product, as per the standards required by them. The basic Function is to source the facility/product, which fulfills the needs of the inquiry, sent by the buyer and to place the orders on behalf of the buyer to coordinate between the buyer and us, at various stages of the production process, ensuring that the end product meets the basic standards required.

In the current climate of enhanced social awareness, Naowars strives to work with suppliers who meet the requirements, not only of product quality, but environmental and ethical standards, as well. To endorse our commitment to these standards, we have adopted the social accountability international standard, as the workplace code of conduct for our suppliers production facilities throughout our global network.

This manual aims at outlining the procedures followed by Naowars globally, to ensure our customers get a quality product, through a defined inspection process and strict quality control.
